

INSTALLATION INSTRUCTION FOR BOLON STUDIO

General

Requirements and preparation is the same as for corresponding instruction for tiles. However, there are some differences and these are described in this manual.

Before installation

The purpose with Bolon Studio is to provide opportunity for creative installations. Depending on the tile's shape and how they are installed in relation to each other, different effect/pattern arises.

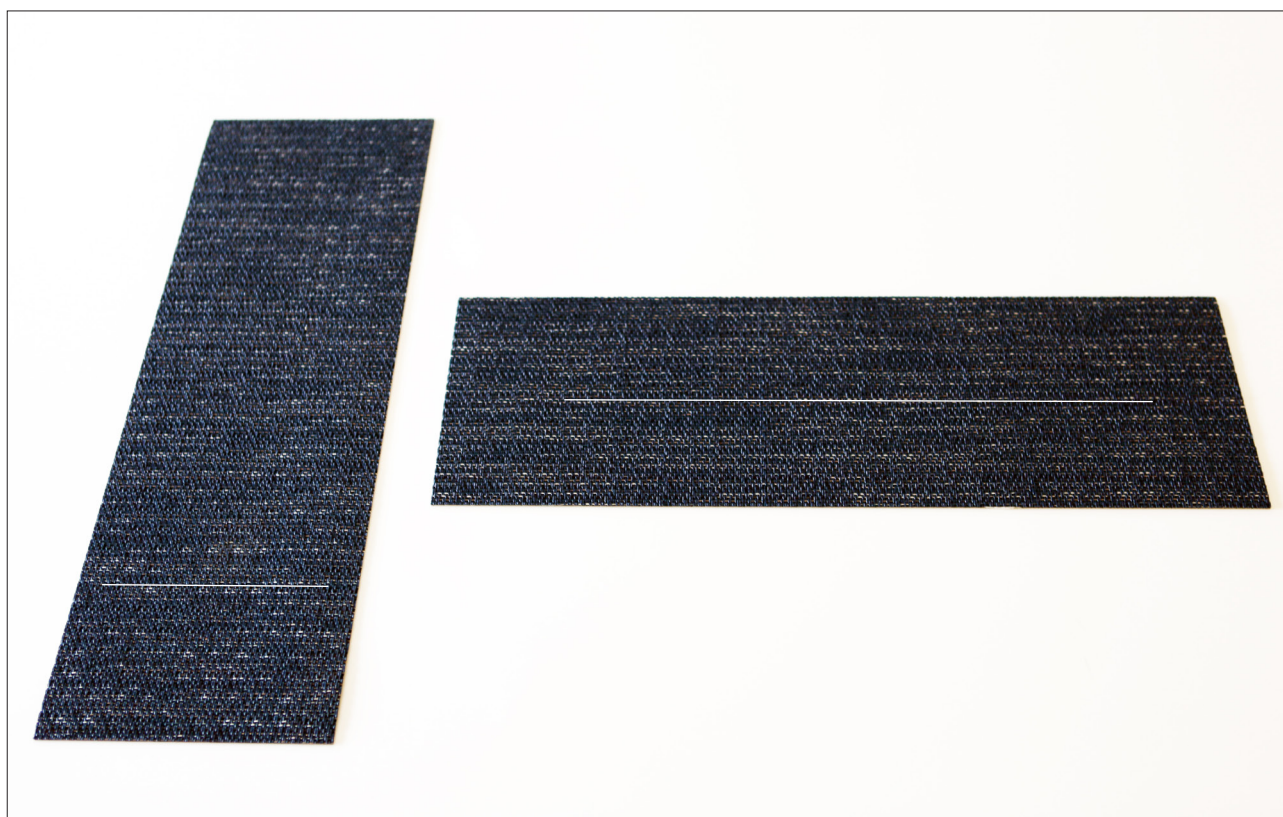

Some shapes is delivered with quarter turned pattern see picture 1. In these cases about 50% is delivered in each direction.

Therefore, please confirm with client how the tiles should be installed before installation begins.

Installation

Bolon Studio tiles are based on wall to wall material. Therefore always use permanent adhesive to avoid possible curling.

Tiles with corner different from 90°, such as triangles and wing, are harder to fit than traditional tiles. To make sure a good installation it requires a subfloor leveled max 1 mm/m. Start in the center of the room and install only in smaller confined areas. Pay attention to the arrow to get a uniform appearance.

Picture 1. The white line shows direction of cross yarn (weft).
